Scope 1	0		
Scope 2	3		
Scope 3 (Included Sources)	35		
Total Emissions	38		

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to $30\ t\text{CO}_2\text{e}$ by 2026. This is a reduction of 36%

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

In 2022, the following reduction measures were taken

- Migrated some services from our own servers to the cloud
- Put in place an electric car scheme, which incentivises employees to switch to an electric car
- Put in place a 'bike to work' scheme, which subsidises the purchase by employees of bicycles
- Continued with reduced commuting and more meetings online after the end of the Covid-19 pandemic

In the future we hope to implement further measures such as:

- Reduce air travel
- Switch to green electricity suppliers
- Increase the number of meetings taking place online
- Migrate all of our internal IT from being hosted by our own servers to being hosted on cloud platforms such as Amazon Web Services, Microsoft Azure and Google Cloud Platform
- Monitor the carbon reduction progress of cloud platforms and migrate our services to those which are most successful in carbon reduction (Google already claims it is carbon neutral)
- Encourage staff to use public transport, cycle or walk to work
- Encourage staff to use electric cars where road car travel is the only practical option.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
